

Weekly Team Progress Report

Scope of Report: **9/24/2019** to **10/01/2019**

1 Progress

We discussed the Vision and Scope document and figured out our project schedule. We also determined some estimates for each module of the project that will be developed. We assigned each other to a module/functional requirement of the project so that everyone has a role to play in the development of the application.

2 Status

2.1 Deliverables status

The Vision and Scope document is completed. The Project Plan document is currently being worked on and is expected to be complete by 9/29/2019.

2.2 Risk status

We risk not sticking to our project schedule. If someone is sick or otherwise unable to complete their part of the project, that would put us behind schedule.

3 Plans

3.1 Planned hours vs. actual hours worked

We planned to meet Thursday, September 26 for 2 hours. The actual meeting time was only 1 hour and 22 minutes though. We were able to accomplish what we needed to do in this amount of time.

3.2 Plans for next week

Next week begins the Design phase. We will start figuring out how the UI will look and function and what the classes/objects we need will be.
